

Description : these visuals allow you to see and distinguish completely clear partitions or glass separations in public areas. They are especially helpful in areas where partial or full coverage is not necessary.

For : entry doors, automatic doors, office partitions, hospitals, airports, schools, workshops, train stations, museums...

Application method : internal surface with soapy water.

Glass maintenance : the film may be cleaned with soapy water, 30 days after the application. Any abrasive products that could scratch the film, are not recommended. Do not apply any stickers, or any other type of adhesives on the film.

Durability : 12 to 15 years for vertical application in Central Europe.

Guarantee : 10 years.

Storage : 2 years from the delivery date. This film has to be kept away from excessive humidity. It also has to be stored away from direct sunlight at a temperature under 38°C.

Important factors : the glass surface used must be entirely dirt free and any grease or other filth must be removed prior to installation.

Material	PVC 70 microns
Adhesive	Acrylic polymer 13 gr/m ²
Release liner	Siliconed paper 100 microns
Application	Internal
Visual 05	Red circles Diameter : 5 cm
Visual 06	Frosted circles Diameter : 5 cm
Thermal resistance	from -20°C to 80°C
Application temperature	Minimum 5°C
Quantity	Pack of 60

Fire performance class

M1

Please make sure to match the correct specifications when applying your film. You may follow the glass compatibility guideline, especially concerning thermal stress.

Please note that Reflectiv does not guaranty the glass quality or the incorrect use of its films and claims the possibility of changing the production process or tints without previous notification.
